“

Two decades of Indian ground beneath our tracks — and a horizon of **nation-building** still ahead. We move rock, but we build trust.

Mr. Anil Kumar

Managing Director & Founder

B.E. Mining Engineering · 30+ Years in
Opencast Mining · Ex-Coal India Ltd.

Since 2006, Anil Mincon Private Limited has grown from a single Rajasthan quarry into a multi-state contract-mining and infrastructure services organisation trusted by India's leading EPC majors.

Our story is not written in press releases — it is measured in cubic metres of hard rock moved on schedule, in zero-LTI months on live corridors, and in relationships that have outlasted single project cycles by decades.

The pages that follow set out — with precision and without embellishment — the operational depth, financial track record and forward-looking commitments that define AMPL as we step into our third decade.

— Anil Kumar

CONTENTS

01 · EXECUTIVE SUMMARY

A trusted execution partner for India's builders.

AT A GLANCE

Mining engineers, mechanised, mission-ready.

Anil Mincon Private Limited (AMPL) is a Jaipur-headquartered contract-mining services organisation delivering turnkey opencast mining, hard-rock excavation, drilling & blasting and large-scale infrastructure earthwork across six Indian states.

AMPL is one of India's premier mid-tier contract mining services providers — delivering comprehensive turnkey solutions across mining, quarrying, hard-rock excavation, drilling & blasting and large-scale infrastructure development.

With operational excellence spanning nearly two decades, AMPL is a trusted execution partner for leading EPC majors, public-sector enterprises and Fortune 500-tier infrastructure developers across India.

From our Jaipur base, we orchestrate multi-state operations through a self-owned heavy-equipment fleet and a mining-engineer-led project team — backed by a proven record of safe, on-schedule delivery under demanding site conditions.

Heritage & strategic vision.

From a single quarry in Rajasthan to national-highway alignments across six Indian states — the arc of a mining engineer's ambition, told in cubic metres and calendar quarters.

02 · HERITAGE & JOURNEY

From a Rajasthan quarry to nation-scale corridors.

Founded in 2006 by Mr. Anil Kumar, a mining engineer with over three decades of field experience, Anil Mincon Private Limited began its journey as a specialised quarrying contractor in Rajasthan. Its first contract — with Punj Lloyd Infrastructure Ltd. — set the tone for a two-decade record of on-schedule execution under demanding site conditions.

Over successive expansion cycles, the Company evolved into a multi-state contract mining and infrastructure services provider, contributing to thermal power, national highway, expressway, airport and industrial projects of national significance. It was formally incorporated as a Private Limited entity in 2012.

Landmark engagements followed with GMR Infrastructure at the Delhi IGI Airport (2008-2010), Jaiprakash Associates at the BINA Thermal Power Project (2010-2013), and Oriental Structural Engineers on the Odisha NH-6 widening (2018-2021).

The Delhi-Vadodara Greenfield Expressway (NH-148N) and the Raipur-Visakhapatnam Expressway (RVAP-1) marked AMPL's arrival as a preferred earthwork and hard-rock partner for H.G. Infra Engineering Ltd.

Today, AMPL operates across Rajasthan, Madhya Pradesh, Maharashtra, Andhra Pradesh, Odisha and Delhi-NCR — with a self-owned fleet of 30+ heavy equipment units and a Vision 2030 roadmap spanning IoT-enabled fleet management and renewable-energy site preparation.

TWENTY-YEAR MILESTONES

2006

Inaugural quarrying contract with Punj Lloyd Infrastructure — Rajasthan.

2008-2010

Aggregate supply of ~10,00,000 MT for GMR at Delhi IGI Airport.

2010-2013

Site preparation & excavation for Jaiprakash Associates — BINA Thermal Power, MP.

2012

Formal incorporation as Anil Mincon Private Limited (CIN U14200RJ2012PTC038467).

2016

Maharashtra contract mining — cumulative ~20 Lakh MT output.

2018-2021

Odisha NH-6 widening with Oriental Structural Engineers.

2020

Delhi-Vadodara Expressway (NH-148N) earthwork — H.G. Infra.

2023-2025

RVAP-1 Expressway hard-rock excavation, Andhra Pradesh — Zero LTI.

Vision 2030

IoT-enabled fleet MIS & renewable-energy site preparation.

03 · LEADERSHIP

The people behind every project.

A mining-engineer-led organisation, AMPL is governed by a compact founding team whose combined field experience underwrites every contract we sign.

MANAGING DIRECTOR · FOUNDER

Mr. Anil Kumar

B.E. Mining Engineering · 30+ years · Ex-Coal India Ltd.

A first-generation entrepreneur, Mr. Kumar personally oversees project planning, safety compliance and client engagement across all AMPL sites. His hands-on approach to opencast operations and controlled drilling & blasting is the technical backbone of the Company.

EXECUTIVE DIRECTOR

Mrs. Meera Devi

Diploma in Mine Surveying · Statutory Compliance Lead

Mrs. Meera Devi leads mine planning, geological mapping and statutory survey deliverables. Under her stewardship, AMPL's operational records remain audit-ready and fully aligned with DGMS and client EHS protocols.

04 · VISION · MISSION · VALUES

The compass of 2030.

VISION 2030

Where we are going.

To emerge as India's most respected and technologically advanced contract mining conglomerate — recognised for sustainable practices, digital transformation and the building of the nation's infrastructure backbone.

MISSION

How we get there.

Deliver mechanised, safe and cost-efficient mining and excavation solutions. Embrace IoT-enabled fleet management. Expand service offerings into renewable-energy infrastructure and environmental management.

CORE VALUES

Six commitments, written into every contract.

01 · INTEGRITY & TRANSPARENCY

Every quotation, every measurement, every invoice — auditable.

02 · SAFETY FIRST, ALWAYS

DGMS-aligned HSE with a Zero-LTI record on flagship projects.

03 · ENGINEERING EXCELLENCE

Mining-engineer-led project teams and OEM-backed equipment.

04 · ON-TIME DELIVERY

Two decades of schedule discipline under EPC-major scrutiny.

05 · ENVIRONMENTAL STEWARDSHIP

Controlled blasts, dust suppression & re-vegetation programmes.

06 · LONG-TERM PARTNERSHIPS

Multi-award relationships with H.G. Infra, GMR, IRB and more.

05 · SERVICE PORTFOLIO

Turnkey solutions, end to end.

CONTRACT MINING

01

Contract Mining Operations

Turnkey opencast mining including overburden removal, deep-hole drilling, controlled blasting, mineral extraction, hauling and sizing — delivered under a single accountable contract.

DRILLING & BLASTING

02

Hard-Rock Excavation · D&B

Specialised drilling & blasting for granite and basalt formations on highway and expressway alignments — with loading, disposal and sizing per client specification.

EARTHWORK

03

Infrastructure Earthwork

Bulk earthwork, embankment formation, cut-to-fill operations and granular sub-base preparation for railway, airport and expressway packages.

AGGREGATES

04

Quarrying & Aggregate

Construction aggregates, ballast and crushed stone with integrated in-pit crushing and screening for highway and railway construction.

PROJECT MANAGEMENT

05

End-to-End Delivery

Full lifecycle ownership — mobilisation, scheduling, safety compliance, quality assurance and MIS reporting for EPC clients.

LOGISTICS & RENTAL

06

Equipment Rental

Integrated material handling plus a rental pool of excavators, compressors, crawler drills and rock breakers for other EPC contractors.

Owned. Operated. Mechanised.

A 30-strong self-owned fleet — from TATA Hitachi excavators to Atlas Copco crawler drills — eliminates sub-contractor risk on every AMPL site, on every shift.

06 · MECHANISED FLEET & EQUIPMENT

30+ units, one accountable operator.

FY 2024-25 saw a ₹1.86 Crore expansion adding six new units effective 01 October 2024 — including air compressors, crawler drills and 45-T class excavators.

SCOPE

Hard-rock excavation (~98,814 m³) via controlled drilling & blasting, including breaking, loading and disposal to designated leads.

CLIENT · LOCATION

H.G. Infra Engineering Ltd. · Vizianagaram, Andhra Pradesh · 2023-2025.

EXECUTION HIGHLIGHTS

Delivered fully on schedule with a Zero Lost-Time-Injury record — achieved under demanding hard-rock strata and a live-corridor construction environment where every blast was designed for controlled vibration and third-party safety.

OUTCOME

Contract completed to client specification. Repeat-engagement partner status confirmed with H.G. Infra Engineering Ltd.

FRAMEWORK

Documented Health, Safety & Environment framework strictly aligned with DGMS (Directorate General of Mines Safety) guidelines and client-specific EHS protocols across every state of operation.

OPERATIONAL DISCIPLINE

Daily toolbox talks · pre-shift safety briefings · mandatory PPE compliance · certified blasters for all drilling & blasting activities · controlled-blast designs with vibration monitoring on sensitive corridors.

ENVIRONMENTAL STEWARDSHIP

Dust suppression, water-mist & noise-attenuation measures · phased induction of fuel-efficient Stage-IV / V equipment · overburden re-vegetation programmes on completed sites.

STATUTORY COMPLIANCE

Full statutory compliance with PF, ESIC, Labour Welfare and Pollution Control Board standards across all six states of operation — with audit-ready documentation.

Let's build the **next horizon** together.

Whether you are planning a hard-rock expressway package, a thermal-power site or a multi-year contract mining engagement — our project desk is ready to scope, mobilise and deliver.
